### Profile:

Hello! I'm Isaac and **here's what you need to know about me in one sentence:**

I have been developing web apps in HTML5, CSS3, Javascript as well as React; I always make user experience a top priority as well as making them fully-featured and visually appealing.

### Projects:

#### Movie/TV Show Review API App

<https://movie-review-site.netlify.app/>

-App fetches data from the TheMovieDatabase API and displays a list of reviews for a particular movie or tv show. Also displays the average review rating for the movie or tv show. Has also been optimised for mobile devices.  
-Tech Used - HTML5, CSS3, Javascript, Git

#### React Code Snippet Library

<https://react-snippet.herokuapp.com/>

-App stores code snippets for future use. Allows user to be efficient and save time when creating projects. Snippets organised into categories. Users can add new snippets and delete snippets. Users can also add and delete categories.  
-Tech Used - HTML5, CSS3, React, Javascript, Git

#### Personal Portfolio Site

<https://www.isaackhanportfolio.com>

-Website which showcases my skills and my best projects. Went with a minimalist design as simplicity is important for a portfolio site. Site also has CSS effects to improve user experience.  
-Tech Used - HTML5, CSS3, Javascript, Git

### Education:

Birmingham City University - BEng Electrical and Electronic Engineering (2014-2017)

- Completed 2 years of a 3 year course. Seeking to complete third year through online distance learning (on own time) in 2021

### Soft Skills:

Ability to adapt to unexpected situations quickly without close supervision
